

## NOTICE FOR CLASS-IX

**Dear Parent,**

Kindly note that CBSE has introduced two levels of Mathematics for All India Secondary School Examination (Class-X) from the academic session-2022-23 onwards which we feel is a great initiative taken by Board and this also aligns with the philosophy of our school which believes that every child must be given a chance of opting subjects as per his/her need and interest. Hence kindly go through the following points thoroughly and tick the appropriate Level of Mathematics for Class-X Board Examination of your ward.

- 1) First level will be known as **Mathematics - Standard** which is the existing level of examination and the other will be known as **Mathematics - Basic** for the easier level of the exam (for the students who do not want to pursue Mathematics at higher level).
- 2) The syllabus, classroom teaching and internal assessment for both the levels will be same.

Kindly select one subject for your ward according to his/her interest and do inform us about the same up to **2 March, 2022** through Google Form or in School, so that subject may be allotted to your ward accordingly in the new session.
